

IN THE CLAIMS

Please amend claim 37 as follows. A clean version follows, while a marked-up version of claim 37 is submitted herewith and attached hereto.

37. **(Amended)** A polymer product comprising an isotactic polymer produced by the polymerization of an alpha olefin in the presence of a catalyst system comprising a transition metal component in the form of a chiral, stereorigid metallocene having the formula:

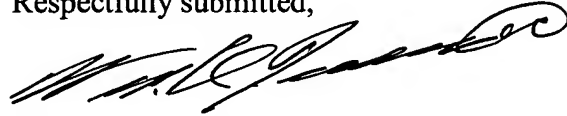

cl
wherein (C₅R'_m) is a substituted cyclopentadienyl group in which R' is a hydrogen or a hydrocarbyl radical having from 1-20 carbon atoms, each R' being the same or different, and R'' is a silicon hydrocarbyl radical acting as an interannular bridge between the two (C₅ R'_m) rings, provided that at least one R' is a hydrocarbyl radical imparting chirality to said stereorigid metallocene, Q is a hydrocarbon radical chosen from the group consisting of an aryl, alkyl, alkenyl, alkylaryl and arylalkyl radical having 1-20 carbon atoms or is a halogen; Me is a group 4b, 5b, or 6b metal as designated in the Periodic Table of Elements; $1 \leq m \leq 4$; and $0 \leq p \leq 3$.

It is respectfully requested that claim 37 be entered prior to examination of this application.

The Commissioner is hereby authorized to charge our Deposit Account No. 12-1781 for any fee that may be due in connection with this communication.

Respectfully submitted,
